

**VOLUNTARY REMEDIATION PROGRAM  
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

**PROJECT SUMMARY**

<b>Site Name:</b>	CTP Corporation
<b>Applicant's Name:</b>	CTP Corporation
<b>Site Location:</b>	3750 South Shelby Street Indianapolis Marion County
<b>VRP Site Number:</b>	6961008
<b>Project Manager:</b>	Bill Wieringa
<b>Date Application Received:</b>	October, 1996
<b>Date Project Completed:</b>	August, 1999
<b>Project Duration:</b>	2 years, 10 months
<b>Contaminant Group(s):</b>	Volatile Organic Compounds (VOCs), Semi-Volatile Organic Compounds (SVOCs)
<b>Media Cleaned Up:</b>	Surface Soil, Subsurface Soil, Groundwater
<b>Cleanup Goals Achieved:</b>	Tier II Nonresidential
<b>Deed/Land Use Restrictions:</b>	Nonresidential

**Project Description:** Prior to 1977, the site was used for paper manufacturing. CTP Corporation purchased the property in 1977 for metal product manufacturing.

Five (5) underground storage tanks (USTs) were closed at the site in 1994. The two (2) USTs of concern along the south side of the site building showed signs of gasoline and paper-impregnating oil impacts at the time of closure. Follow-up investigations have shown that in these areas, there are no constituents of concern above the Tier II Nonresidential Cleanup Goals. The site proposed that no remedial action was required for the site soils and groundwater.

The site monitored the groundwater for four (4) consecutive quarters with no detection of any constituent of concern. Confirmation sampling supported the recommendation of no further action.
